

Olsson Industrial Electric, the premiere industrial electrical contractor in the Pacific Northwest, is currently looking for experienced electrical journeyman to join our awesome team.

What you will be responsible for: Construction and maintenance of electrical systems in large, industrial buildings, including mills, factories, hydroelectric facilities, wastewater treatment plants, hospitals, schools, etc.

Duties include but are not limited to;

- Following design, plans and blueprints in order to dig for and place conduit.
- Hanging 3"+ rigid conduit on factory walls and ceilings.
- Running wires or cables through conduit in order to complete circuits between power supply and boxes/switches, etc.
- Using testing equipment to check the circuits for proper connections, ensuring electrical compatibility and safety of components.
- Connecting motors to electrical power and installing electronic controls for industrial equipment.
- Repairing motors, transformers, generators, electronic controllers, etc.
- Inspecting equipment, and locating and correcting problems before breakdowns occur.
- Following strict safety procedures including customer/company safety standards, the National Electric Code, NFPA70E and complying with State and local building codes when installing systems.

Requirements:

- Current Washington General Journeyman (01) license and or Oregon General Journeyman license (plant electrician licenses are not applicable).
- A clean driving record
- Industrial experience
- Willingness to travel to various jobsites throughout Oregon and/or Washington
- Availability to work occasional weekend and nights.
- Credentials necessary to work in the US

Compensation:

\$45-\$50 or more (based on experience) overtime, per diem, insurance, 401(k) with a 5% employer match, bonuses, profit sharing and more! Apply today!
